ABOUT US

SANTINI PROJECT is the expression of the experiences made by its founder Roberto Santini within the retail industry and the interior design. Since 2018, our expertise focuses on visual communication, offering innovative and tailored solutions to enhance our customers identity.

Our mission is to work with architects and construction companies to design lighting signs for worldwide luxury brands.

We guarantee a targeted consultation, a thorough research of materials, a controlled internal production supervised at every stage, providing high quality pre-and post-sales support services.

We collaborate with professionals in order to design Made in Italy letters and logos, combining craftsmanship and expertise, turning ideas into final products.

FULL SERVICE

Our commitment is to provide a full sales support service.

Each price list is customized and contains all the necessary information: technical data, drawings and clear and precise installation instructions.

This targeted approach ensures that customers can make informed choices and can efficiently use our products.

IN-HOUSE PRODUCTION

One of our strengths is the internal management of every crucial phase of the production to guarantee top quality lights and precise solutions.

The working process starts from the technical design and includes: the cutting of materials, the casing phase, the welding of metals, the preparation of semi-finished products for external treatments (plating and painting), the wiring and the preparation of light installations, the resin casting, the assembling process, the quality control and the final product packaging.

Thanks to specialized tools, a team of technical experts and a deep knowledge of the materials, we handle every operation very carefully and with attention to details, granting excellent results to satisfy every requests.

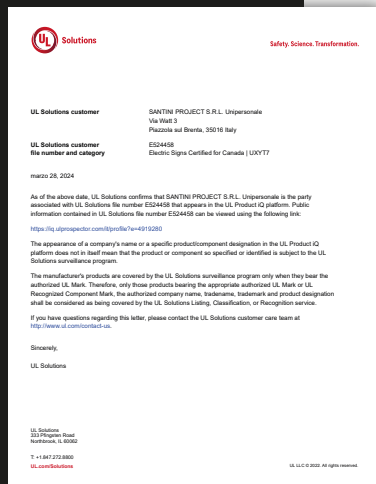

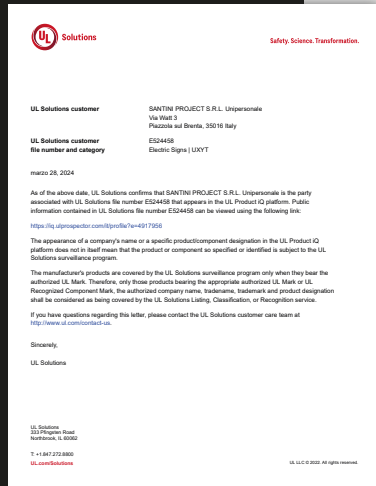

CERTIFIED WARRANTY

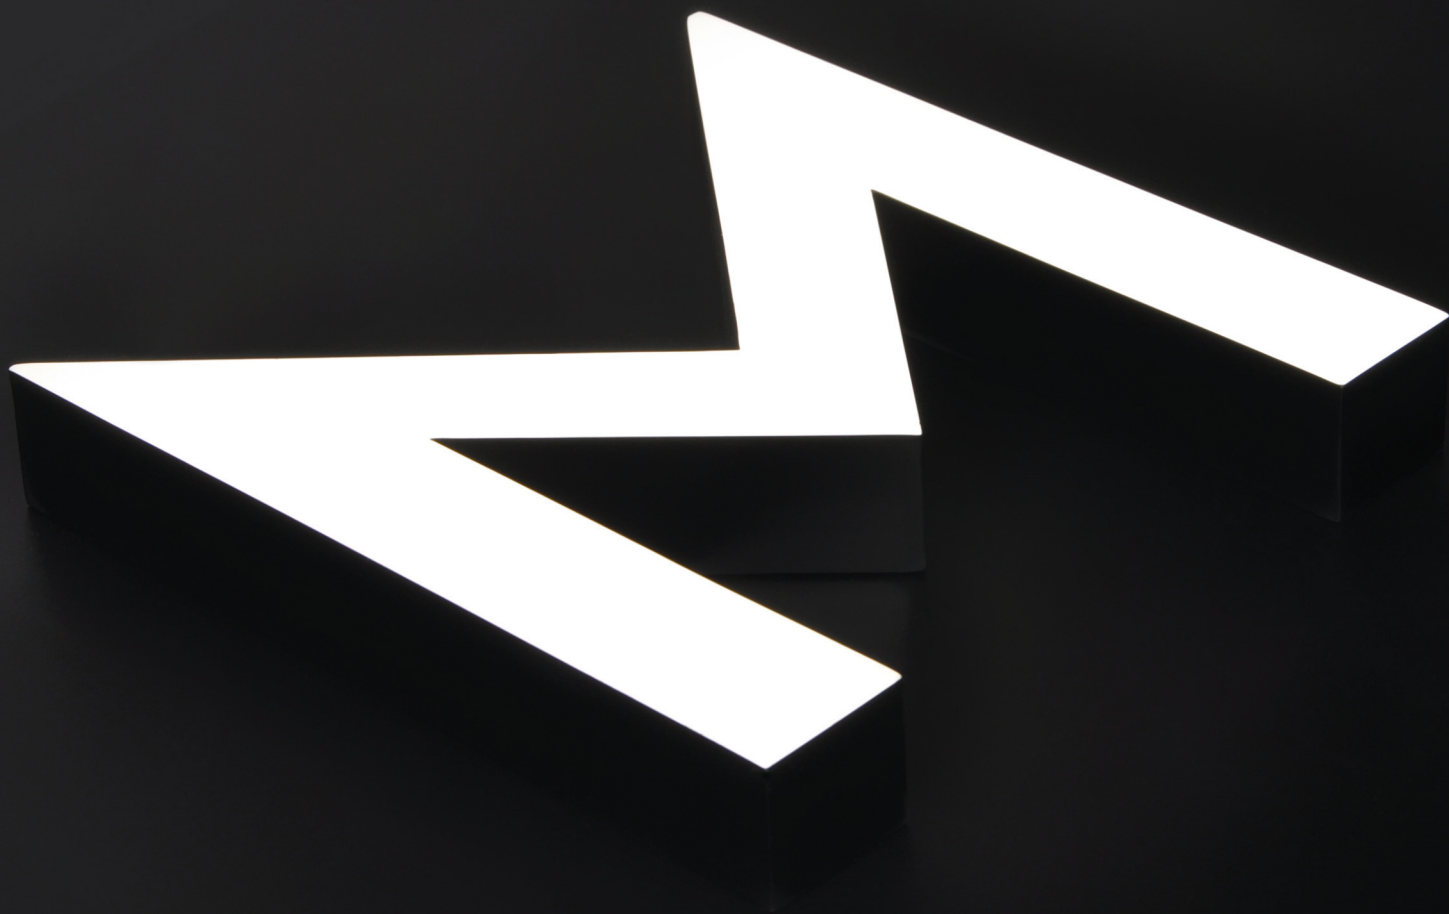

In SANTINI PROJECT we guarantee the highest quality and the maximum safety of the products through the UL and CE certifications.

The first one is an international certification, which guarantees high safety devices and highperformance standards in the United States and Canada.

The CE marking confirms the compliance with legislative requirements of the UE, ensuring that our products meet the strictest requirements in terms of safety, health and environmental protection.

These certifications demonstrate our commitment to offer trustworthy and safe solutions to all our customers worldwide.

FRONTLIT

FRONT LIGHT SIGNS

Front light signs made with different designs and materials. From the traditional channel letters to the solid ones, created from the acrylic/ methacrylate block.

The Frontlit signs are a LED system perfect for any use and kind of communication.

BACKLIT

REFLECTED

LIGHT

SIGNS

Painted signs with blind front. The light comes out from the back of the sign, lighting up the support where it has been installed.

The Backlit signs have a LED system and can be used both indoor and outdoor. Their design is made for little, medium and big sizes.
